# Webinar Platform Tips

Compliance & Risks

WHY WE'RE HERE

Reimagining compliance for a world of increasing regulation and fewer resources.

# Compliance Reality Today

1

More complexity,  
fewer resources

- Regulations are growing
- 30%+ in the last 3 years
- but your teams aren't.

2

Higher expectations,  
higher stakes

- Regulators, customers, and markets are demanding more.
- Non-compliance = fines, recalls, lost trust.

3

Still too manual

You spend too much time finding, interpreting, and disseminating information instead of acting on it.

# There Should be a Better Way - Now There Can be

## Agentic AI is here.

Smarter, contextual  
AI agents that reason  
and act, not just  
generate.

## Manual to automated.

Compliance tasks like  
regulation assessments,  
applicability checks, and  
action planning can now  
be done for you.

## Reactive to proactive.

Move from static  
reports and alerts to  
real-time risk signals  
and prioritized actions.

## Built for scale.

Today's compliance  
complexity is no longer  
human-scalable. AI is  
the multiplier.

AI has changed the game.

## OUR VISION

Automating sustainability & product compliance throughout the product life cycle - for any product, in any market, for any size company - powered by regulatory expert backed AI you can trust.

# Next Gen Platform - Designed for a New Era

## AI-First, Agent-Led Platform

Built from the ground up to leverage intelligent agents - automating regulatory analysis, applicability, and action generation.

## Integrated Across Sustainability & Product Compliance

One platform for CSRD, Battery Reg, ESPR, REACH - no silos.

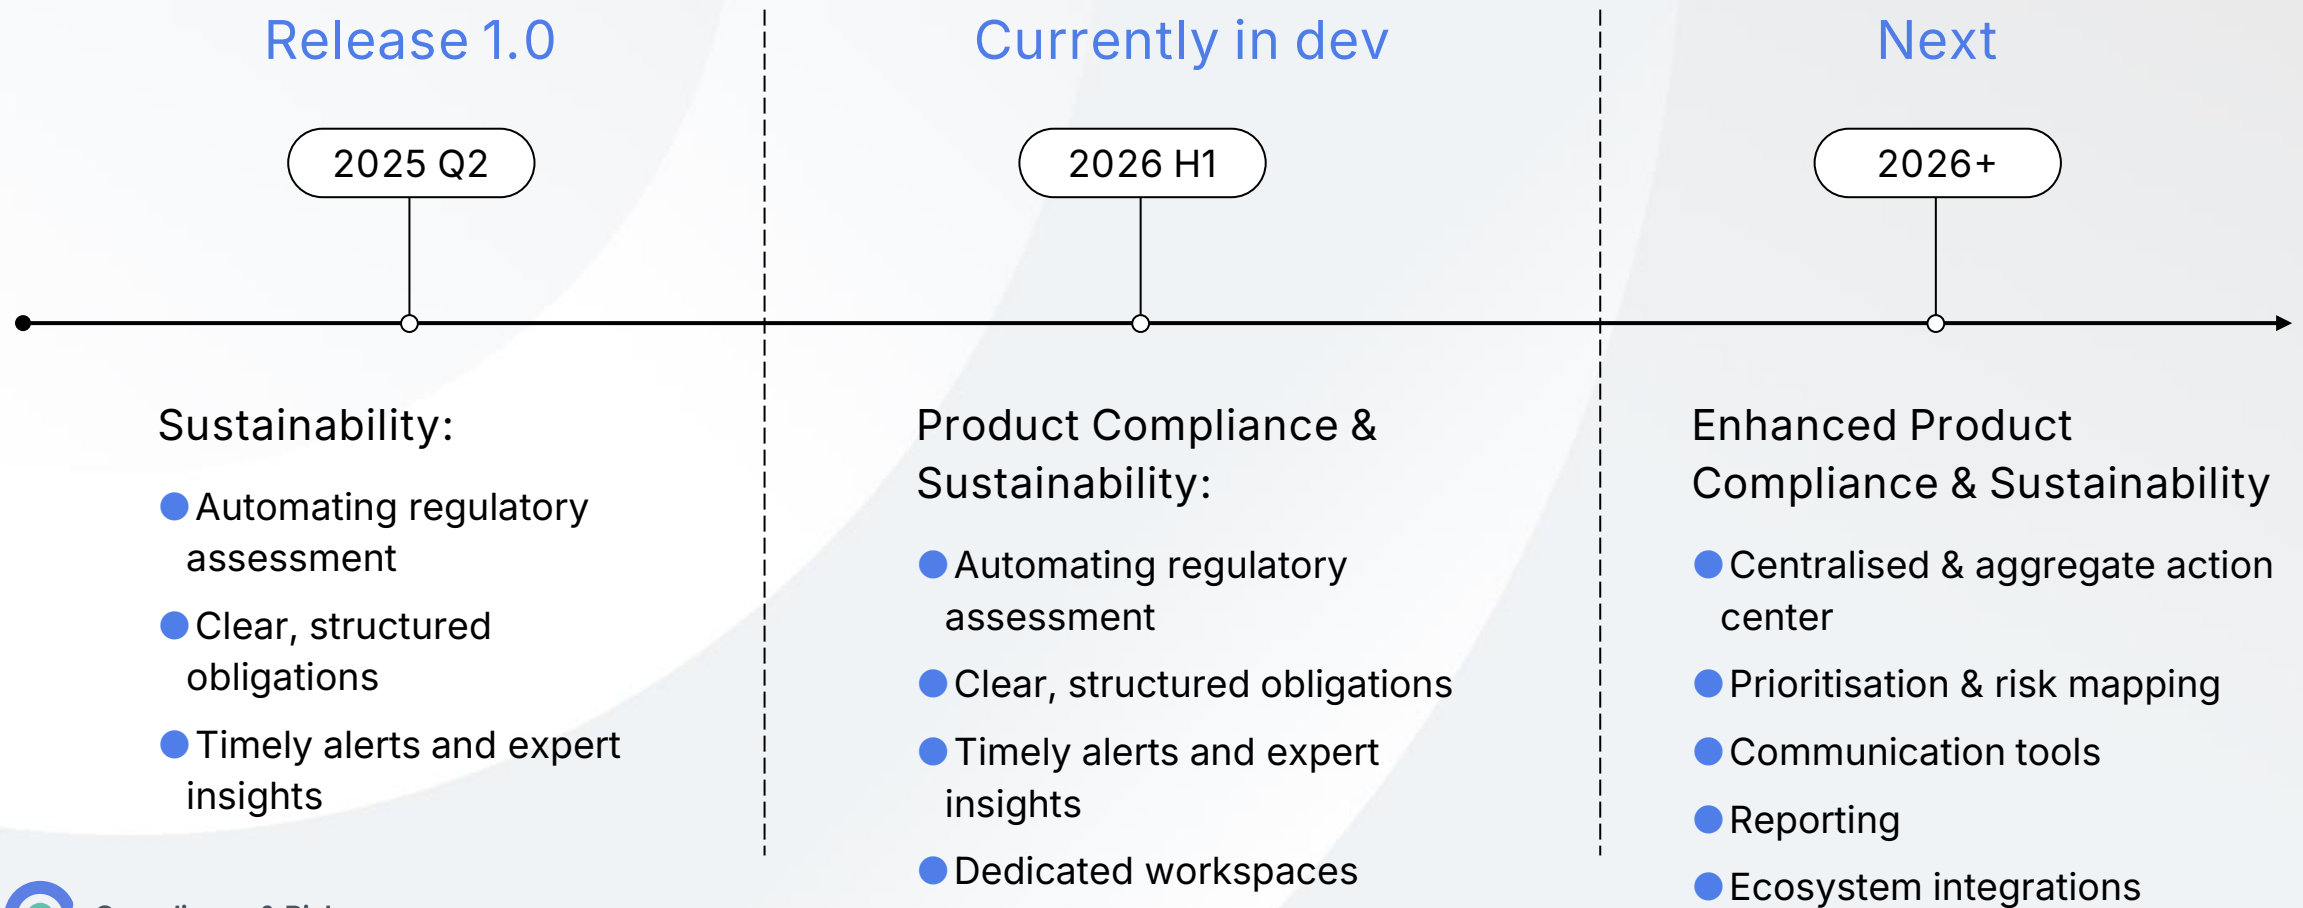

## From Tasks to Business Impact

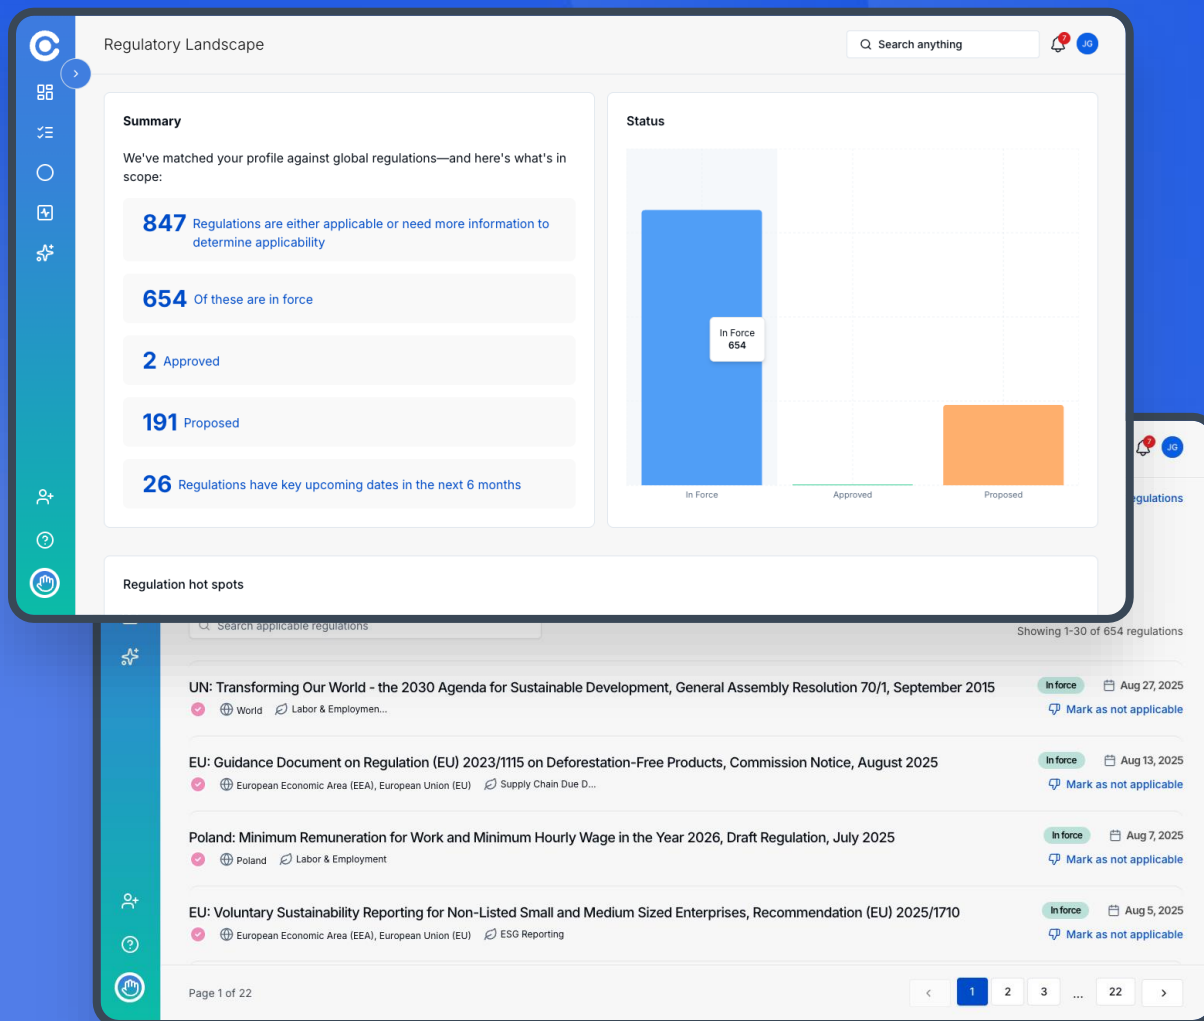

Connect ESG compliance to risk reduction, revenue at risk, and growth opportunities.

## Contextual & Role-Based

Role-specific views: sustainability, product, regulatory affairs, supply chain.

# What Customers are Saying

"We've needed something like this for a long time."

User - 17.07.2025

"I like the concept and getting the platform with everything digested by territory."

User - 21.07.2025

"What I would find most useful is if it could tailor it to my little teeny tiny world — like climate change, ESG reporting, sustainability — rather than everything."

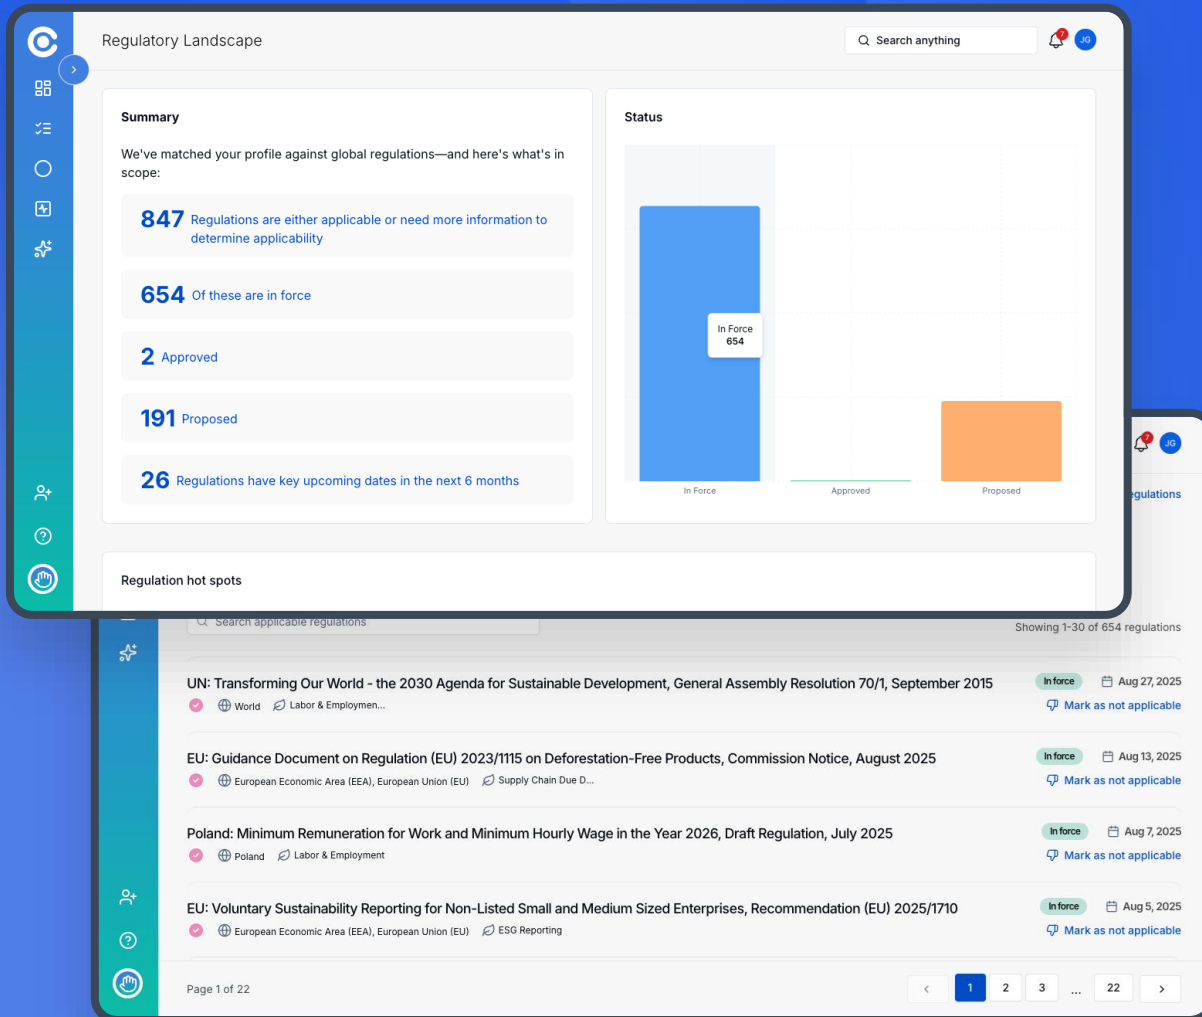

User - 07.08.2025

It will be great to integrate with C2P (referring to Product compliance).... Otherwise, I don't know if it works for us."

# Why You Can Trust our AI

Our AI is not a black box, Purpose-built for compliance

1

20+ years of  
global compliance  
data

Across industries,  
geographies, and  
product categories.

2

Expert-in-the-  
loop oversight

From 40+ regulatory  
specialists who  
validate and refine  
accuracy.

3

Continuous  
validation &  
governance

Through our central  
AI operations engine.

4

Strict privacy  
standards

Data anonymised,  
aggregated, and  
securely segmented.

# Content Roadmap

1

## Increase R&D capacity

- Our dedicated content R&D team leverages new technologies to augment regulation acquisition.
- Our objective is to grow from thousands to millions of regulations to support customer growth.

2

## Regulatory Topics

- Adding new regulations in C2P, covering 50+ geographies (incl. states/provinces)
- Researching additional ESG topics such as pollution, biodiversity & ecosystems.
- Developing sector agnostic topics like global corporate governance regulations.

3

## Customer Content Prioritisation

- What are your 'top 5' regulatory content areas that you need to enable growth in your business?
- Customer requests are aligned with the content roadmap to adjust planning for their needs.
