

2025

Product Compliance *Wrapped*

What's *trending* in the world of product compliance?

2025 brought an unprecedented level of complexity and volume to the global product compliance landscape.

With new and amended regulations spanning chemicals, product safety, packaging, and labeling, compliance professionals faced a constant stream of updates across every major market. The pressure to stay aligned with evolving standards - while managing risk and market access - intensified across industries.

In this annual wrap-up, we highlight the most-viewed regulations, trending compliance areas, and top jurisdictions shaping the product compliance space in 2025.

Let's unwrap the data that defined product compliance in 2025.
